

FIGURE 1

FIG. 1 is a schematic cross-sectional view of a heat transfer device 200. The device includes a copper plate 272, a heat flux 212, a height invention 268, a heat source 240, a heat pipe 228, and a fan 264. Heat removed 236 is shown being transferred from the heat source to the heat pipe. The device is shown in a cross-sectional view with various components labeled with reference numerals.
